## Description

Model DCD-CE3M is a Marine Approved Rate of Rise Heat Detector with a 90°C fixed temperature element using a thermistor and linearising circuit to provide an accurate linear response Heat Detector.

The DCD-CE3M is ideal for use where medium ambient temperatures exist, such as drying rooms or where Smoke Detectors are unsuitable because of the presence of steam or cooking fumes such as in a kitchen/galley.

The DCD-CE3M is supported on the majority of conventional systems. A third terminal provides remote indicator output.
