

FIREscape

EL-IO

Input/Output Unit

Features

- 4 inputs - can be configured as opening or closing
- 2 outputs - can be configured as N/O or N/C.
- Used to interface / link FIREscape to third party systems

Description

EL-IO is an I/O unit which is connected to a line of the EL-2 Emergency Light Control Panel, from which it receives its power.

The EL-IO is used as to interface FIREscape to any third party systems like; building fire detection and alarm, occupant warning, security / CCTV, manual control, BMS, DALI & phase monitoring systems. This interface enables the activation of selected Dynamic Exit signage and / or emergency escape lighting via "cause & effect" programming logic, and also ensures system integrity by providing notifications on system performance.

Specification

Dimensions (mm)	100H x 110W x 35D
Case colour	White
Operating Voltage DC	24V – 41V
Power consumption	0.1 W
